

Chitrala Badrinath

Software Engineer

chbadrinath123@gmail.com — +91 9154441942 — LinkedIn

Professional Summary

- Results-driven Software Engineer with 4+ years of experience in designing scalable, high-performance SON solutions to optimize network performance and automate network management.
- Strong expertise in Python, FastAPI, and Flask for building scalable backend and cloud-native applications.
- Experience in Machine Learning and Agentic AI, developing LangChain-powered intelligent agents for enterprise use cases.
- Skilled in designing AI-driven automation workflows to improve operational efficiency and reduce manual effort.
- Proficient in data structures, algorithms, and system design with a strong focus on scalability, performance optimization, and software architecture.
- Strong background in REST APIs, distributed systems, DevOps, and container orchestration using Redis, Kafka, Docker, Kubernetes, Jenkins, and Helm.

Technical Skills

- **Programming Languages:** Python , Go, Java, Shell Scripting
- **Backend:** FastAPI, Flask
- **AI / ML:** Machine Learning, LangChain, Agentic AI
- **Frontend:** React.js
- **ORM:** SQLAlchemy
- **AI / ML:** Machine Learning, Agentic AI
- **LLM Frameworks:** LangChain
- **Cloud & DevOps:** Docker, Kubernetes
- **CI/CD:** Jenkins, Helm, Ansible
- **Distributed Systems:** Redis, Kafka, RabbitMQ
- **Databases:** MySQL, PostgreSQL, Cassandra
- **Monitoring:** Prometheus, Grafana
- **Software Engineering:** REST APIs, System Design, DSA, Git, PyTest, Cursor

Work Experience

Software Engineer

September 2022 – Present

Nokia Solutions and Networks
Bangalore, India

- Led customer-driven initiatives from requirement analysis to production delivery, driving performance optimizations that improved system efficiency and scalability by **30%**.
- Optimized core SON modules (Energy Saving Management, PCI), achieving **5% lower RAN energy consumption** and **10% higher network performance** through automated network optimization.
- Designed and integrated the KPI Prediction Service with the Energy Saving module.
- Built KPI Prediction Service using **LSTM-based ML models**, improving forecasting accuracy by **15%** and enabling proactive network optimization.
- Designed Python-based backend services and Agentic AI automation tools, reducing manual effort by **40%** and accelerating testing workflows.
- Built ML models and intelligent agents using transfer learning, reducing existing handover failures by **15%** and increasing Handover success rate to **97%**.
- Performed unit tests, performance tests, and integration tests to optimize CPU, memory, and time usage.
- Resolved complex issues raised by customers including T-Mobile, Orange France, Vodafone Italy, RJO, STC, Orange Romania, Orange Spain, Digicel, and HT Croatia.
- Mentored **5+** engineers while driving **20% higher engineering efficiency** and maintaining **98% delivery success** through CI/CD, code quality initiatives, and Agile practices.

Software Developer Intern

March 2022 – September 2022

One Trust Privacy Management
Bangalore, India

- Built a Python-based data generation tool using Faker, creating **1M+ test records** across MySQL, PostgreSQL, MS SQL Server, and MongoDB to accelerate performance testing.

Education

B Tech in CSE

2018 – 2022

NIE Mysore
CGPA: 9.67

Interests

- Cooking, Learning Languages, Skating
